

quickness_end_handler

```
graph LR; A[quickness_end_handler] --> B[default_end_handler]
```

A diagram showing a call from the quickness_end_handler to the default_end_handler. The quickness_end_handler box is on the left, shaded gray, and the default_end_handler box is on the right, white. A blue arrow points from the right side of the quickness_end_handler box to the left side of the default_end_handler box.

default_end_handler
