

DllMain

initialize\_framework

register\_vanilla\_sub  
\_effect\_handlers

```
graph LR; A[DllMain] --> B[initialize_framework]; B --> C[register_vanilla_sub_effect_handlers];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'DllMain', followed by an arrow pointing to a box labeled 'initialize\_framework'. A second arrow then points from 'initialize\_framework' to a final box labeled 'register\_vanilla\_sub\_effect\_handlers'. The final box is shaded gray, while the others are white.
