

src/internal/handlers  
/sf\_ai\_spell\_handlers.h

```
graph BT; A["src/internal/handlers/sf_ai_spell_handlers.cpp"] --> C["src/internal/handlers/sf_ai_spell_handlers.h"]; B["src/internal/registry/ai_data_registries/sf_ai_singletarget_registry.cpp"] --> C;
```

The diagram illustrates a dependency structure where two source files, `sf_ai_spell_handlers.cpp` and `sf_ai_singletarget_registry.cpp`, both include the header file `sf_ai_spell_handlers.h`. The header file is located at `src/internal/handlers` and is highlighted in a grey box. The source files are located at `src/internal/handlers` and `src/internal/registry/ai_data_registries` respectively, and are shown in white boxes. Blue arrows point from each source file to the header file, indicating the inclusion relationship.

src/internal/handlers  
/sf\_ai\_spell\_handlers.cpp

src/internal/registry  
/ai\_data\_registries/sf  
\_ai\_singletarget\_registry.cpp
