

src/internal/handlers  
/sf\_ai\_avoidance\_handlers.h

```
graph BT; A["src/internal/handlers  
/sf_ai_avoidance_handlers.cpp"] --> C["src/internal/handlers  
/sf_ai_avoidance_handlers.h"]; B["src/internal/registry  
/ai_data_registries/sf  
_ai_singletarget_registry.cpp"] --> C;
```

The diagram illustrates a dependency structure where two source files, `/sf_ai_avoidance_handlers.cpp` and `_ai_singletarget_registry.cpp`, both include the header file `/sf_ai_avoidance_handlers.h`. The header file is located in the `src/internal/handlers` directory, while the source files are in `src/internal/handlers` and `src/internal/registry/ai_data_registries/sf` respectively. Blue arrows indicate the direction of the dependency from the source files to the header file.

src/internal/handlers  
/sf\_ai\_avoidance\_handlers.cpp

src/internal/registry  
/ai\_data\_registries/sf  
\_ai\_singletarget\_registry.cpp
