

src/internal/handlers  
/sf\_spelldamage\_handlers.h

```
graph BT; A["src/internal/handlers/sf_spelldamage_handlers.h"] <-- B["src/internal/handlers/sf_spelldamage_handlers.cpp"]; A <-- C["src/internal/registry/sf_spelldamage_registry.cpp"]
```

The diagram illustrates the relationship between three source files. At the top is a header file box labeled 'src/internal/handlers/sf\_spelldamage\_handlers.h'. Below it are two source file boxes: 'src/internal/handlers/sf\_spelldamage\_handlers.cpp' on the left and 'src/internal/registry/sf\_spelldamage\_registry.cpp' on the right. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
